

Career development fellowship List of mentors

Georg Behrens

Institution: Hannover Medical School

City: Hannover **Country:** Germany

Areas of interest, expertise and active research programmes: HIV Medicine and Immunology.

Sanjay Bhagani

Institution: Royal Free Hospital

City: London **Country:** United Kingdom

Areas of interest, expertise and active research programmes: Managing complex OIs in the context of HIV immunosuppression and viral hepatitis/liver disease in HIV+ patients

Antonella Castagna

Institution: Ospedale San Raffaele

City: Milan **Country:** Italy

Areas of interest, expertise and active research programmes: Management of HIV virological failure, multidrug resistance, therapeutic strategies

Yvonne Gilleece

Institution: Brighton and Sussex Medical School

City: Brighton **Country:** United Kingdom

Areas of interest, expertise and active research programmes: HIV ageing, Co-morbidities and the brain, HIV and STD prevention and treatment, HIV and climate change

Christine Katlama

Institution: Pitié-Salpêtrière University Hospital

City: Paris

Country: France

Areas of interest, expertise and active research programmes: Management of HIV, pregnancy in HIV, sexual health and PREP, ART Therapeutic council, vaccination center. Active clinical research with around 25 ongoing clinical studies.

Justyna Kowalska

Institution: Hospital for Infectious Diseases in Warsaw

City: Warsaw

Country: Poland

Areas of interest, expertise and active research programmes: Effects of COVID infection in HIV patients, PROMs - especially for women, STIs and HIV

Karine Lacombe

Institution: Saint-Antoine University Hospital

City: Paris

Country: France

Areas of interest, expertise and active research programmes: HIV co-infection with TB or viral hepatitis, STI, PREP, co-morbidities with HIV, ARV strategies.

Jens D. Lundgren

Institution: Rigshospitalet, University of Copenhagen

City: Copenhagen

Country: Denmark

Areas of interest, expertise and active research programmes: Clinical cohort and randomised trial studies of HIV, viral hepatitis, TB and respiratory infections incl influenza and SARS-CoV-2. CHIP has a broad network of collaborative partners, with particular focus on Europe, including countries in the central and eastern regions. Also, CHIP is designed WHO Collaborative center for these expertise areas, and has an extensive collaboration with WHO-Europe and the ECDC.

Jean-Michel Molina

Institution Saint-Louis and Lariboisière Hospitals

City: Paris **Country:** France

Areas of interest, expertise and active research programmes: treatment and prevention of HIV and STIs

Cristina Mussini

Institution: University of Modena and Reggio Emilia

City: Modena **Country:** Italy

Areas of interest, expertise and active research programmes: Immunopathology of HIV, Co-morbidities, Ageing and frailty, Treatment strategies, Impact of dolutegravir + lamivudine or biktarvi on CD4/CD8 ratio

Milosz Parczewski

Institution: Infectious Diseases and Hepatology Clinic, Pomeranian Medical University, District Hospital

City: Szczecin **Country:** Poland

Areas of interest, expertise and active research programmes: Migration, resistance, PreP, Standards of Care

Andri Rauch

Institution: Inselspital Bern

City: Bern **Country:** Switzerland

Areas of interest, expertise and active research programmes: HIV and hepatitis, and metabolic complications (<https://orcid.org/0000-0001-5297-6062>)

Peter Reiss

Institution: Academic Medical Centre, University of Amsterdam

City: Amsterdam **Country:** Netherlands

Areas of interest, expertise and active research programmes: Long-term complications in treated HIV in persons with HIV as they age. (<https://agehiv.nl/en/>)

Jürgen Rockstroh

Institution: University Hospital Bonn

City: Bonn **Country:** Germany

Areas of interest, expertise and active research programmes: HIV and liver disease including viral hepatitis co-infections

Alison Rodger

Institution: University College London and Royal Free Hospital London

City: London **Country:** United Kingdom

Areas of interest, expertise and active research programmes:

Alison Rodger has academic expertise in epidemiology and healthcare research in people living with HIV including observational clinical cohort studies, mixed methods research and randomised trials of complex interventions. She leads an internationally competitive research programme in HIV including large research collaborations and grant applications with sustained high-quality outputs and significant impact on policy and practice aimed at improving the long-term outcomes of people living with HIV, HIV testing and HIV prevention.

Caroline Sabin

Institution: University College London

City: London **Country:** United Kingdom

Areas of interest, expertise and active research programmes: Statistical/epidemiological and with cohorts in HIV and ageing; clinical/epidemiological research focussed around data analysis.
