

Career development fellowship List of mentors

Josip Begovac

Institution: The University Hospital for Infectious Diseases

City: Zagreb

Country: Croatia

Areas of interest, expertise and active research programmes: rapid ART initiation, cardiovascular risk, opportunistic infections and PrEP

Jose I. Bernardino

Institution: Hospital Universitario La Paz-Carlos III

City: Madrid

Country: Spain

Areas of interest, expertise and active research programmes: simplification strategies in ART, and especially co-morbidities in HIV and novel biomarkers of ageing in HIV. Currently, we are running several research projects on coronary artery disease in people with HIV and metabolic associated liver disease.

Antonella Castagna

Institution: Ospedale San Raffaele

City: Milan

Country: Italy

Areas of interest, expertise and active research programmes: Management of HIV virological failure, multidrug resistance, therapeutic strategies

Yvonne Gillece

Institution: Brighton and Sussex Medical School

City: Brighton

Country: United Kingdom

Areas of interest, expertise and active research programmes: HIV ageing, co-morbidities and the brain, HIV and STD prevention and treatment, HIV and climate change

<https://www.bsms.ac.uk/research/global-health-and-infection/research-areas/hiv-and-sexual-health.aspx>

Deniz Gökengin

Institution: Ege University Fac of Medicine

City: Izmir

Country: Türkiye

Areas of interest, expertise and active research programmes: testing and early diagnosis, antiretroviral treatment, patient follow-up, and epidemiology. Our ongoing and developing studies and projects are:

- * Real-world data on DTG+3TC use among treatment-experienced PLWH in Türkiye
- * Scaling-up HIV testing among inpatients: How to raise awareness and change behavior?
- * HIV screening for indicator conditions at the emergency department
- * Early HIV diagnosis with anonymous testing among key populations (at the development stage)
- * Changes in sexual behavior and lifestyle among people living with HIV after HIV diagnosis: A qualitative and quantitative study (at the development stage)
- * Trends in the epidemiology of STIs in Europe (at the development stage)

David Jilich

Institution: Bulovka University Hospital

City: Prague

Country: Czechia

Areas of interest, expertise and active research programmes: vaccination and HIV/STI's co-infection

Justyna Kowalska

Institution: Hospital for Infectious Diseases in Warsaw

City: Warsaw

Country: Poland

Areas of interest, expertise and active research programmes: Effects of COVID infection in HIV patients, PROMs - especially for women, STIs and HIV

Karine Lacombe

Institution: Saint-Antoine University Hospital

City: Paris

Country: France

Areas of interest, expertise and active research programmes: HIV co-infection with TB or viral hepatitis, STI, PREP, co-morbidities with HIV, ARV strategies.

Botond Lakatos

Institution: National Institute of Hematology and Infectious Diseases

City: Budapest

Country: Hungary

Areas of interest, expertise and active research programmes: ARV strategies, opportunistic infections.

Jens D. Lundgren

Institution: Rigshospitalet, University of Copenhagen

City: Copenhagen

Country: Denmark

Areas of interest, expertise and active research programmes: Clinical cohort and randomised trial studies of HIV, viral hepatitis, TB and respiratory infections incl influenza and SARS-CoV-2.

CHIP has a broad network of collaborative partners, with particular focus on Europe, including countries in the central and eastern regions.

Also, CHIP is designed WHO Collaborative center for these expertise areas and has an extensive collaboration with WHO-Europe and the ECDC.

Paddy Mallon

Institution: Mater Misericordiae University Hospital

City: Dublin

Country: Ireland

Areas of interest, expertise and active research programmes: Ageing in HIV, co-morbidities, Host Pathogen interactions.

Esteban Martinez

Institution: Hospital Clínic of Barcelona

City: Barcelona **Country:** Spain

Areas of interest, expertise and active research programmes: tolerability of antiretroviral medication, simplification of antiretroviral medication, and co-morbidities in persons with HIV.

Jean-Michel Molina

Institution: Saint-Louis and Lariboisière Hospitals

City: Paris **Country:** France

Areas of interest, expertise and active research programmes: treatment and prevention of HIV and STIs

Silvia Nozza

Institution: Ospedale San Raffaele

City: Milan **Country:** Italy

Areas of interest, expertise and active research programmes: PrEP and STIs, HIV treatment

Roger Paredes

Institution: Hospital Germans Trias i Pujol

City: Barcelona **Country:** Spain

Areas of interest, expertise and active research programmes: HIV therapeutic vaccine/cure studies

Konstantinos Protopapas

Institution: Attikon University Hospital

City: Athens **Country:** Greece

Areas of interest, expertise and active research programmes: STIs, migration, late presentation and stigma. Currently we are working on several projects in my department, including doxy-PEP, STI and HPV screening, "U=U awareness", erectile dysfunction.

Peter Reiss

Institution: Academic Medical Centre, University of Amsterdam

City: Amsterdam **Country:** The Netherlands

Areas of interest, expertise and active research programmes: long-term complications in treated HIV in persons with HIV as they age. (<https://agehiv.nl/en/>)

Jürgen Rockstroh

Institution: University Hospital Bonn

City: Bonn **Country:** Germany

Areas of interest, expertise and active research programmes: HIV and liver disease including viral hepatitis co-infections

Caroline Sabin

Institution: University College London

City: London **Country:** United Kingdom

Areas of interest, expertise and active research programmes: statistical/epidemiological and with cohorts in HIV and ageing; clinical/epidemiological research focused on data analysis.

Jaime Vera

Institution: Brighton and Sussex Medical School

City: Brighton

Country: United Kingdom

Areas of interest, expertise and active research programmes: HIV ageing, co-morbidities and the brain, HIV and STD prevention and treatment, HIV and climate change

Annemarie Wensing

Institution: UMC Utrecht

City: Utrecht

Country: The Netherlands

Areas of interest, expertise and active research programmes: Clinical Virology

Research focus:

HIV drug resistance

HIV reservoirs, persistence and cure

HIV long-acting drugs

Ongoing projects: Rosetta, Icistem
