

The Warsaw Declaration for provision of standards of care for hepatitis in Central and Eastern Europe

13th May 2017, Warsaw, Poland

In recognition of the need to build regional capacity in improving HCV and HBV prevention, treatment and care , the undersigned hereby declare their will to promote programs, projects and activities aimed at the universal use of antiviral treatment for HCV and HBV infection and comprehensive anti-HBV vaccination in the Central and Eastern Europe region and neighbouring countries, a strategy which conforms with European standards of care.

The undersigned wish to underline the key role in the above process, as the most effective strategy to reduce mortality/morbidity and to eliminate the HCV and HBV epidemic, belongs to governmental and policy-making agencies. Therefore we call these stake-holders to action in enhancing national capacity in this area by more concise and proactive fundraising and strengthening of infrastructure.
