

Women Against Viruses in Europe

Promote the welfare of HIV-positive women in Europe

How to address the gaps in WLWH care that have been identified?

- **Advise** on Guidelines & provide expert level opinion
- **Link** between scientific organizations and practitioners & community representatives
- **Promote** research in prioritised direction
- **Support** other organizations through research assistance and in seeking funds for specific topics
- **Target** regions in Europe where there is a heterosexual epidemics and where women's needs are endangered, with a focus on Eastern Europe
