

## Management of HIV and Co-infections online course Now Available on the new EACS eAcademy!

Stay updated with the latest insights and guidelines on HIV and co-infections with the newly launched Management of HIV and Co-infections online course on the EACS eAcademy. This comprehensive course delves into cutting-edge research and best practices for treatment, prevention, testing, and monitoring activities. Tailor your learning experience by selecting from three engaging sections designed to fit your specific interests and needs.

### **Clinical Management of HIV**

Discover expert presentations on crucial topics such as HIV co-morbidities, IRIS, opportunistic infections, related cancers, and HIV treatment strategies. Grounded in the EACS Guidelines, this section offers invaluable insights from dedicated professionals in the field.

### **Prevention and Treatment**

Immerse yourself in PrEP management and grasp the pivotal role of treatment in prevention strategies. Learn about the impact of these measures on the HIV epidemic and how they can transform public health outcomes.

### **Public Health Perspectives**

Gain a comprehensive understanding of HIV and co-infections from a public health standpoint. This section covers essential topics like prevention, testing, and linkage to care, providing a holistic view of the epidemic and strategies to combat it.

Each section features 20 to 35 concise lectures, ranging from 7 to 15 minutes, allowing you to learn at your own pace. Whether you choose to follow the full course or select specific chapters, this resource is designed to enhance your knowledge and expertise.
